Assign the right people to the right activities

Closely monitor key variables such as the availability and hourly rate of your employees to maximize the profitability of your projects from their inception.
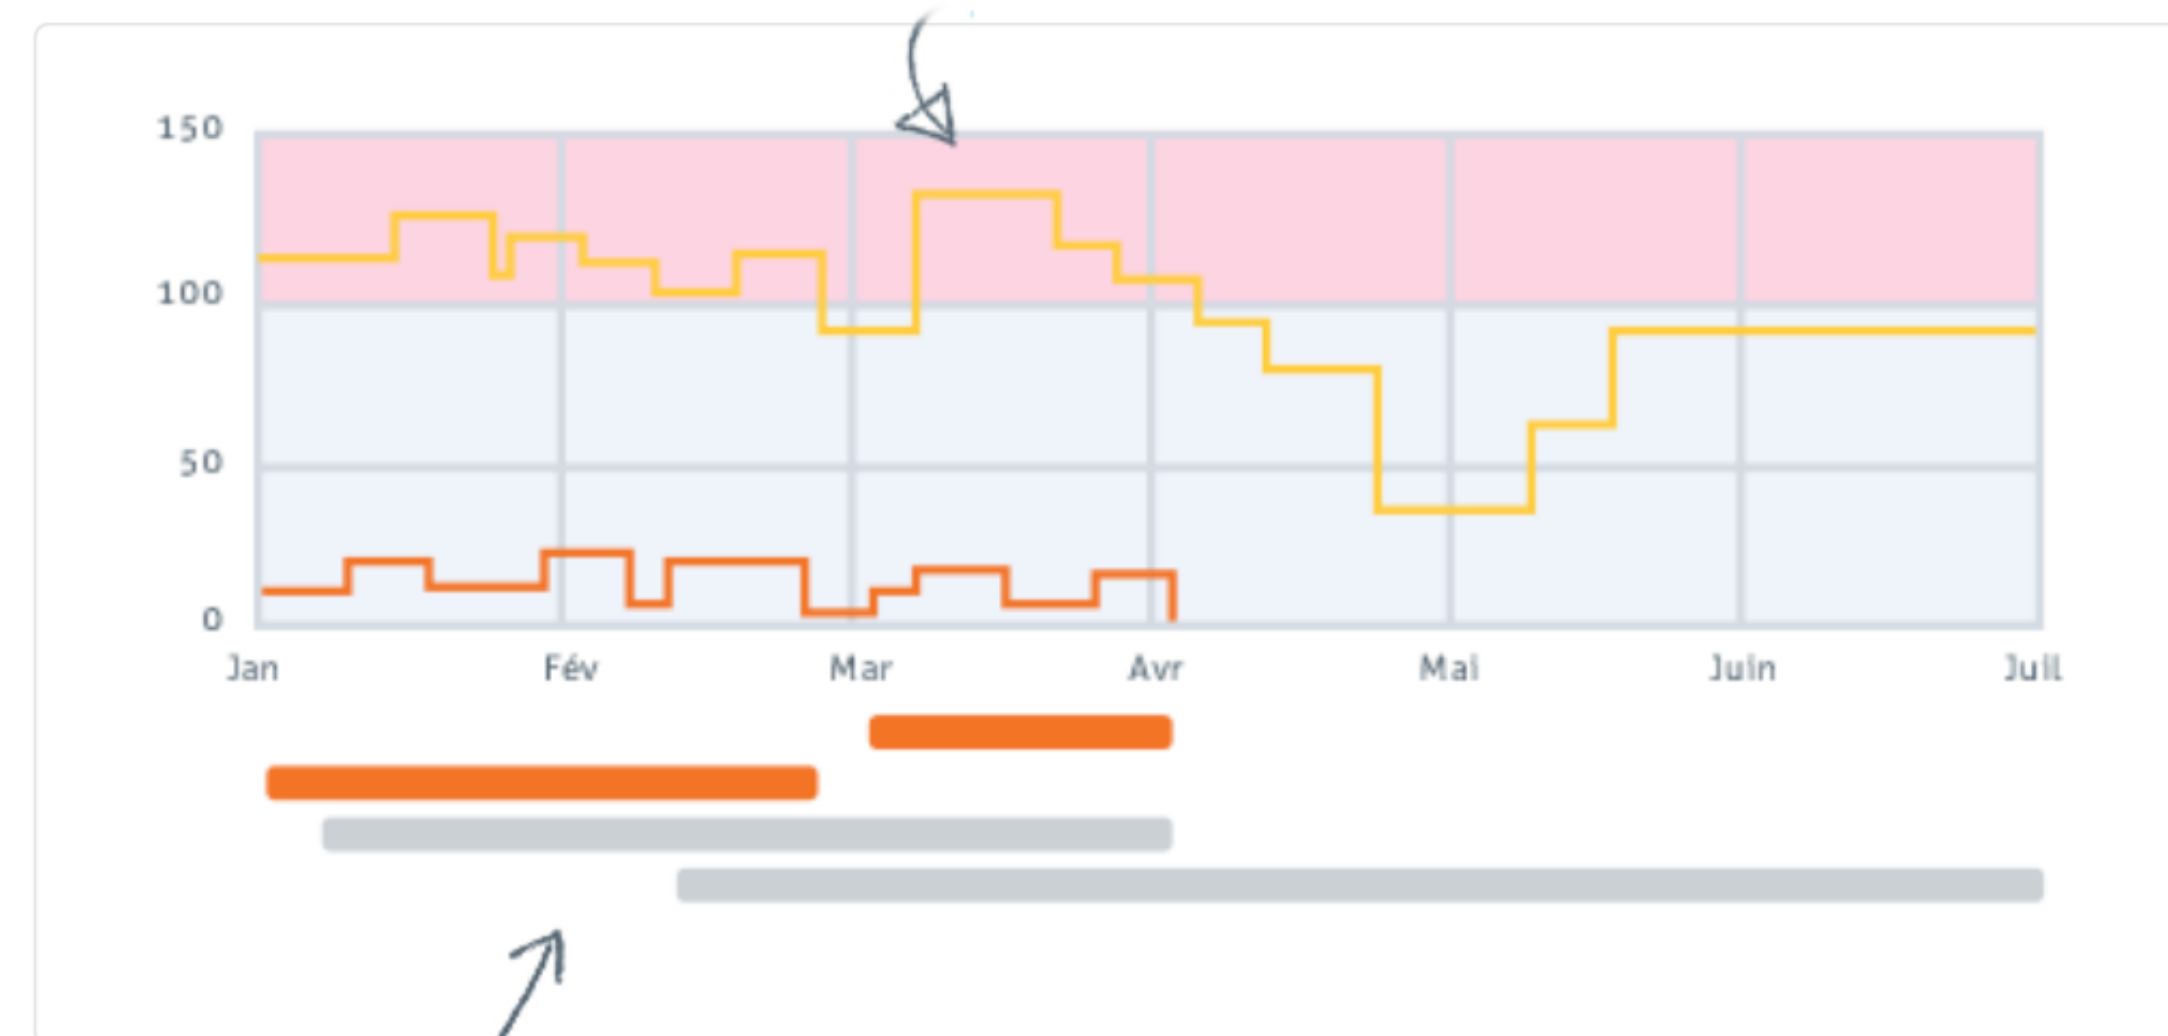

Quickly get an estimate of your needs in efforts and project costs to better anticipate future needs through flexible, clear and up-to-date planning.

Optimize the performance of your projects and initiatives

Coordinate your initiatives at a high level through an overview of all efforts, etc.
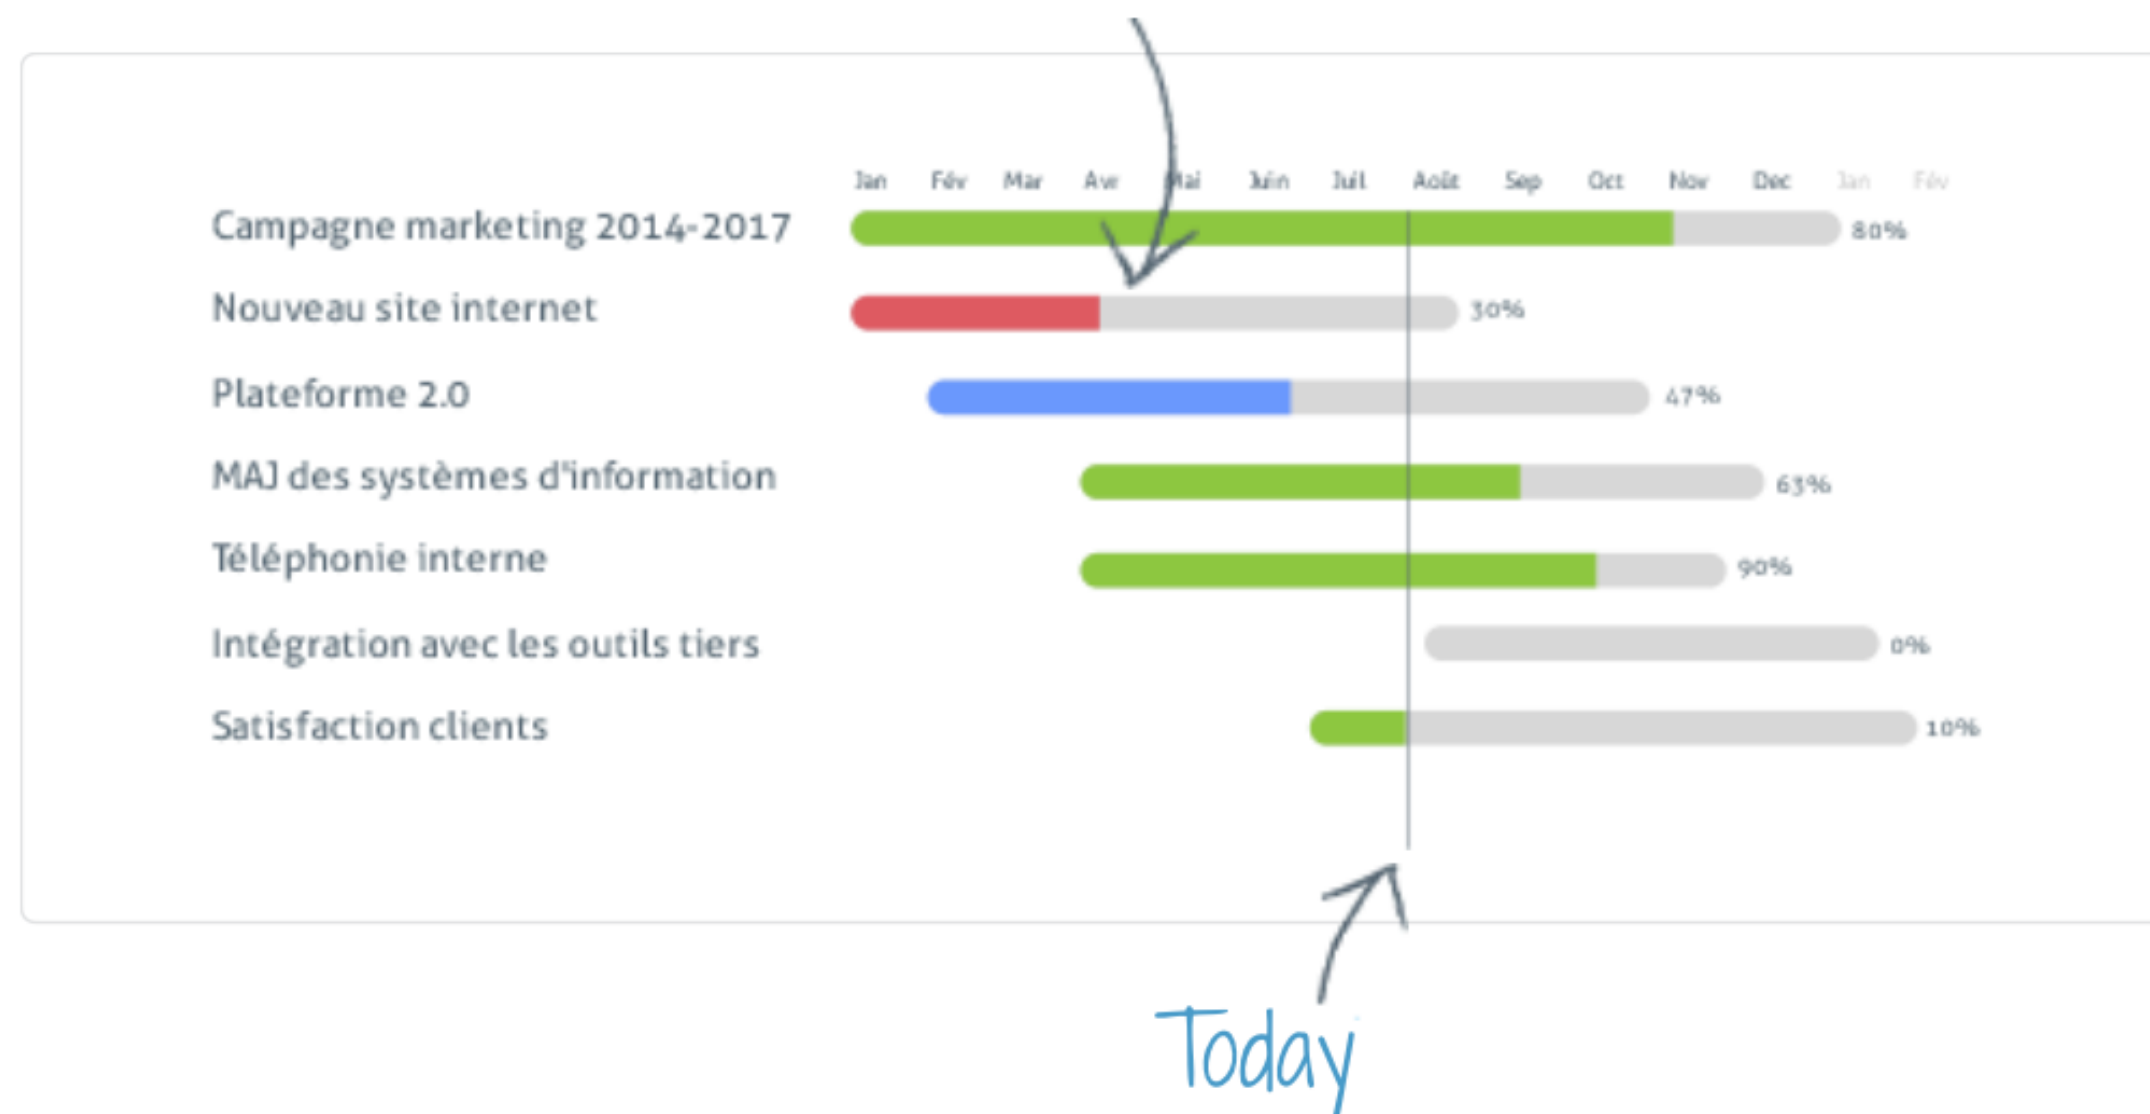

Test different scenarios. When you are over capacity, is it better for you to hire now or to reschedule your projects when more ressources will be available?

Too many projects simultaneously... We must hire or shift certain projects

Forecast capacity by simulating new projects

Follow the progress of your projects

Keep an eye on the progress of your projects and their scheduled end dates to better assess the overall health of your business.

Employees can change the remaining time in an iterative and collaborative way in order to give you accurate and timely data.

![beeye]

Customize the tool to meet your needs

Create an unlimited number of custom fields and key performance indicators to monitor your vital data.

Save your reports to easily find the information your need.

Quickly exports reports to Excel or PDF

Rencontre de priorisation stratégique

Période du **01/01/2016** au **31/12/2016**
